MARSHALL'S SEEDS

W. E. MARSHALL & CO.
166 WEST TWENTYTHIRD STREET
NEW YORK CITY.

THIRTEENTH ANNIVERSARY ANNOUNCEMENT

THIRTEEN years ago we commenced business at 146 West 23d Street and after nine years moved to our present more commodious quarters at 166 West 23d Street, to enable us to handle our increased business.

We thank our numerous patrons and friends for their continued confidence in our goods, which has enabled us to be proud of their patronage, and we hope to still maintain the standard and quality of our goods in the future as in the past.

Our patrons will always find courteous treatment from our fellow workers who have so greatly aided us in the expansion of our business.

January, 1917.

W. E. MARSHALL,
A. E. WHEELER.

ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

PARCELS POST

We deliver free by Parcels Post all seeds, except Beans, Corn, Peas, Farm Seeds or Clovers. If these are wanted by mail please add the cost of postage at zone rates.

Within a radius of 100 miles from New York City we deliver free any order entirely composed of Seeds or Bulbs amounting to two dollars or over, providing cash accompanies the order.

We deliver free by mail all flower and vegetable seeds by the packet, ounce and pound.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for packing or delivery to railroad station, steamer or express office.

GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that any one who applies to us fails of getting the right party. No fee.

We beg to call the attention of our patrons to our complete catalogue (mailed free upon request) containing all kinds of

ROSES, FRUIT TREES, SHRUBS, EVERGREENS,
DECIDUOUS TREES AND HARDY PLANTS.

PRICES

The prices published in this Catalogue are subject to market changes without notice.

Owing to the upward trend in prices of all materials, we cannot bind ourselves on prices of any articles.

SPECIAL NOTICE

Owing to the disastrous war in Europe a great many of the European Seed crops have not been harvested or are prohibited from being exported. At the date of going to press with this Catalogue, we are without final reports from our growers, so we cannot guarantee deliveries on some varieties of seeds, but we will endeavor to fill all orders to the best advantage.

Prices of Seeds and other Supplies are subject to changes with conditions of markets.

SPECIALTIES AND EXHIBITION STRAINS IN VEGETABLES

Marshall's First Crop Cabbage

CABBAGE. Marshall's First Crop

The earliest of all pointed varieties—is distinct from any other on the market at the present time. It is an ideal variety for the private garden, as it takes up but little room, and produces solid hearts sooner than any other sort known to us. Pkt. 10c., oz. 35c., $\frac{1}{4}$ lb. \$1.25.

CARROT. Marshall's Exhibition

A superb type of Intermediate Carrot. The skin is clear, bright in color, and the flesh close in texture, with very small core. In competition on the exhibition stage this variety has carried off more prizes than any other Carrot. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

CARROT. Marshall's Intermediate

This is a carefully selected stock for exhibition purposes. The color and quality are perfect. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

CAULIFLOWER. First and Best

An exceptionally good variety for forcing under glass. This is undoubtedly the earliest and best forcing Cauliflower in cultivation. Pkt. 50c., $\frac{1}{4}$ oz. \$2.50, oz. \$8.00.

KALE. Marshall's Exhibition Curled

This is really the handsomest Kale that has ever come under our notice, and is entirely distinct from other strains. The closely curled, handsome leaves are most attractive. A fine exhibition plant of medium height, Pkt. 10c., oz. 25c.

BEET. Marshall's Dark Leaved Globe

A perfect globe-shaped Beet, with a very dark texture and leaf. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

BEET. Marshall's Exhibition

A selected strain of the Globe type; roots medium size, symmetrical in form, and unrivaled for the exhibition or table use. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

BRUSSELS SPROUTS

Marshall's Exhibition

For exhibition purposes this fine variety is unequalled and it cannot be surpassed for general cultivation. Pkt. 10c., oz. 50c.

Marshall's Exhibition Carrot

SPECIALTIES IN VEGETABLES—Continued

LEEK. Marshall's Giant

The largest and best Leek for exhibition. Highly recommended as the choicest variety in cultivation, of a mild, delicious flavor. Pkt. 10c., oz. 50c.

LETTUCE. Marshall's Matchless

This wonderful head Lettuce produces large, extremely solid, compact heads, very sweet, tender and fine shipping and eating qualities. We have only a limited supply of seeds and offer them in packets only. Pkt. 10c.

MUSK MELON Marshall's Matchless

This Musk Melon is the largest and most luscious Melon we have seen. The fruits average from 15 to 20 pounds in weight, are wonderfully uniform in shape, distinctively ribbed and netted. The flesh is an orange-scarlet color, very thick, edible to the rind and of a luscious flavor; the seed cavity is very small for so large a Melon. Plants produce from five to eight handsome fruits, and the vines are remarkably healthy and vigorous. Pkt. 15c.

ONION. Cranston's Excelsior

This is the leading English Exhibition variety, and well deserves its popularity. It is very large and handsome, inclined to be globular in shape, and of beautiful straw color. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 50c.

Marshall's Matchless Melon

ONION. Invincible Giant

The latest and most important novelty in exhibition Onions. This is not an improved strain of Ailsa Craig, but grown under the same conditions, produces bulbs one-third larger. Pale yellow in color. The seeds we offer are carefully selected for us by an English grower. Pkt. 25c., $\frac{1}{4}$ oz. 50c., oz. \$1.50.

ONION. Ailsa Craig

The skin is a pale straw color, and oval in shape. Excellent for exhibition purposes. The seed we offer is imported and grown from a selected strain. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 50c.

ONION. Giant Gibraltar

This Onion is similar in appearance to the Prizetaker, but is lighter in color and much larger in size. From seed sown in January it will produce huge bulbs over one and a half pounds in weight. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 30c., $\frac{1}{4}$ lb. \$1.00.

PARSLEY. Marshall's Crested Gem

The dwarf compact habit of the plant and the fineness of the closely cut foliage are unsurpassable. Pkt. 10c., oz. 50c., $\frac{1}{4}$ lb. \$1.50.

Marshall's Marrow Parsnip

PARSNIP Marshall's Marrow

This is a choice selection of the English Marrow variety, grown in England specially for us. The roots are clean and white, of the finest quality. As an exhibition variety this has no equal. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c.

PEPPER Marshall's Perfection

Very smooth and uniform in shape; color when ripe a beautiful scarlet red; quality very sweet and delicious. Pkt. 10c., oz. 50c.

SPECIALTIES IN VEGETABLES—Continued

PEA. Kelway's Beauty

The dark green pods are larger, longer and more even in size than Gradus and contain fine, deep green peas. It is very hardy and can be sown early; height 3 feet. $\frac{1}{2}$ pt. 15c., pt. 30c., qt. 60c.

PEA. Marshall's Warrior

Height 5 feet. Main crop, very productive, pods well filled, of deep green color, flavor superb. $\frac{1}{2}$ pt. 20c., pt. 40c., qt. 75c.

PEA. Senator

One of the best main crop curved podded varieties. Height 3 feet. $\frac{1}{2}$ pt. 20c., pt. 40c., qt. 75c.

PEA. The Leader

This is a selection of the rounder seeds of Gradus, and while retaining the earliness of that variety, the pods are larger and produce in greater abundance. Height 3 feet. Pt. 30c., qt. 60c., $\frac{1}{2}$ pk. \$2.25.

POTATO. Norcross

This grand Potato is grown with great success by a Jersey grower from whom we have procured some selected seed. It is a splendid smooth, white-skinned, shallow-eyed variety, a wonderful cropper, cooks very mealy, and is a fine keeper. Pk. 80c., bus. \$2.75, bbl. \$6.00.

RADISH. Marshall's Perfection

This Radish is a very attractive variety. The white tip extends nearly half way up the root, and the brilliant red color of the top shows up in strong contrast. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 30c., lb. \$1.00.

Marshall's
Warrior
Pea

Selected White Milan Turnips

it is the earliest variety grown, an enormous cropper of medium size, producing as many as 30 Tomatoes on a truss. The fruit is a bright scarlet color, perfectly smooth, flesh solid, and contains very few seeds. Pkt. 25c.

TOMATO. Marshall's National

This grand new Tomato is the result of ten years' selecting by a Tomato expert. It has a perfect high crown, entirely free from core, ripens evenly, does not crack, and a brilliant scarlet color. The fruit average about 6 ounces and often have ten in a cluster, of a mild, sweet flavor. It is very early and will mature ripe fruit in 30 days outside from strong plants. Pkt. 25c.

TOMATO. Marshall's Prolific

For forcing we can strongly recommend it as being the best variety, as it sets very freely and is an exceptionally heavy cropper. For outside planting

TURNIP. Selected White Milan

The Milan Turnips are among the earliest in cultivation; roots flat; medium size, quite smooth. Fine for exhibition or family use. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 40c.

It gives us great pleasure to announce that Vegetables grown from our Seeds secured many prizes at the shows in this vicinity and were admired by all who saw them.

Remember to order our specialties when making up your list for 1917 and you will be among the prize winners.

MARSHALL'S VEGETABLE SEEDS

WITH GENERAL DIRECTIONS FOR CULTIVATION.

W. E. MARSHALL & CO. give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich sandy loam is best adapted for this plant. The seed should be sown in drills $1\frac{1}{2}$ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 10c., oz. 50c.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$1.75, 100 \$13.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 25c., pk. \$1.25.

ASPARAGUS

One ounce will produce about 200 plants.

Sow in Autumn or in Spring as soon as the soil is in good working condition. At one or two years transplant to permanent beds.

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture. The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots, and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

ENGLISH OR BROAD BEANS

Sow in drills 2 feet apart as early in the Spring as the ground can be worked (these are as hardy as Peas), in order to get them into pod before the heat of Summer.

POLE OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

DANDELION

The Dandelion affords one of the earliest and most healthful Spring greens or salads.

Improved French. Pkt. 5c., oz. 50c., ¼ lb. \$1.50.

ENDIVE

One ounce of seed for 75 feet of drill.

One of our best salad plants. For a first crop sow about the middle of April; for succession small sowings may be made every month till August, when the main planting is made. Set out the plants 1 foot apart, in rows and when well grown blanch by folding the leaves.

	Pkt.	Oz.	¼ lb.

LETTUCE

One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible, barely covering the seed. If the hotbed is used let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the bed be about 4 inches apart. As they increase in size thin them out or they will become weak. Plant for late use in a cool, partially shaded place in rich soil.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up, lay out your bed according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

Marshall's English Spawn. Per brick 18c., 10 bricks \$1.50, 100 bricks \$12.00.

Pure Culture Spawn (American). Per brick 20c., 10 bricks \$1.75, 50 bricks \$7.50.

If by mail add 5c. per brick for postage.

MUSTARD

One ounce will sow 75 feet of drill.

PARSNIP

One ounce will sow 200 feet of drill.

Sow Parsnip seed as early in Spring as the weather will permit, in drills from 15 to 18 inches apart, covering with fine soil to the depth of half an inch. The soil should be rich and deep; manured if possible, the previous Autumn. Thin out the young plants to about 6 inches apart and keep the surface of the ground open and free from weeds. It is perfectly hardy and may remain in the ground through the Winter. Indeed, the fine sugary flavor is only perfected by a severe frost.

PEAS

One quart will plant about 125 feet of drill.

Peas mature earliest in a light, rich soil; for general crop a rich loam is the best. When grown in gardens sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as early as the ground can be worked in February or March, and continue for a succession every two weeks until July.

POTATOES

GROWN EXPRESSLY FOR SEED IN MAINE

Peck will plant 100 ft. row. Ten bushels cut tubers will plant 1 acre.

The Potato, like the robust-growing vegetables, can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in—the latter in most cases being preferable. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil, about 4 inches deep.

White Tartar. A remarkably handsome and perfect white oat, extremely early, in fact, the earliest variety in cultivation. It is an enormous cropper. The straw is long, very strong, and holds up well. The heads are large and well filled. Pk. 50c., bus. \$1.75, 10 bus. or over, \$1.60 per bus.

Regenerated Swedish Select. Popular for its heavy yields and specially adapted for light soils. Very strong straw and branching habit. Bus. \$2.25, 10 bus. lots, \$2.00 per bus.

Northern Grown American. Very heavy. Bus. \$1.60, 10 bus. \$1.50 per bus.

[Dwarf Essex Rape

PEAS

Canada Field. Valuable for cattle feeding. Also used for ensilage. Sown broadcast in the Spring at the rate of two bushels to the acre. Market price.

Cow Peas, Clay. This variety is of extra strong growth and specially adapted for sowing in Northern States. A first-class green fertilizer; does well on all sorts of soils and under adverse conditions. The feeding value, also, whether in a green or cured state, cannot be overestimated. Sow 2 bushels per acre, 60 lbs. per bushel. Bus. \$4.00.

Cow Peas, Whippoorwill. A very early maturing variety of upright or bush growth. Bus. \$4.00.

RAPE

Dwarf Essex. Fine for sheep pasture; valuable as a soil enricher. Plant in June or July in drills at the rate of 3 lbs. per acre, broadcast 5 lbs. per acre. Can be planted alone or with other forage crops. Lb. 14c., 100 lbs. \$12.00.

RYE

For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel.

Spring. This is excellent for a catch-crop, as it may be sown somewhat later than other grains and produces an abundance of green feed in the Summer season. Pk. Bus. \$0.60 \$2.10

Giant Winter. This variety is fast gaining in popularity as a cover crop and produces an abundant crop of early green feed. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1. .60 2.10

SORGHUM

	Lb.	100 lbs.
Early Amber Sugar-Cane. The earliest and most productive variety. Height 10 to 12 feet. For ensilage or fodder it possesses good qualities; stock of all kinds relish it. Sow 7 lbs. in drills, or 15 lbs. broadcast, to acre.....	\$0.15	\$12.00
Kaffir Corn (Red). Excellent forage for horses and cattle, and excellent feed for poultry. Sow 4 to 5 lbs. per acre.....	.15	12.00

SUDAN GRASS

A new forage crop of immense value. Sudan Grass is strictly an annual and dies each year like Millet and must be seeded again each Spring. Sudan Grass reaches a height of from 7 to 9 feet, yet the stems are small and tender. The plant stools wonderfully and produces under favorable conditions as many as 100 stalks from a single root. The seed should not be planted until the soil has become warm in the Spring and preferably on warm light soil. Sudan Grass will grow better if planted in rows and cultivated, but may be sown broadcast seeded in rows 36 inches to 42 inches apart, 2 to 3 lbs. per acre broadcasted, 16 to 24 lb. per acre. Cut just after bloom, so ample time may be had for second growth. Lb. 20c.; 10 lbs., 18c. per lb.; 100 lbs. \$17.00.

SUNFLOWER

Mammoth Russian. Very productive, large heads with large seeds. Valuable for poultry. Five pounds will plant 1 acre. Lb. 10c., 25 lbs. \$2.00, 100 lbs. \$8.00.

VETCHES, OR TARES

Spring Vetches (*Vicia sativa*). Closely associated with Peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with oats for mowing and feeding to stock. Use 40 to 60 lbs. to the acre. Sow in Spring while ground is cool and moist, or in early Autumn. Lb. 15c., 100 lbs. \$12.00.

Winter Vetches (*Vicia villosa*). Also called Sand Vetch or Hairy Vetch. Recommended for Fall sowing with rye, as in many localities in the North it is hardy, remaining green all Winter. A valuable food for stock in early Spring. Use 30 to 50 lbs. per acre. Lb. 30c.

WHEAT

The seed Wheat we offer is grown in Pennsylvania by a very reliable grower, especially for seed purposes. Sow $1\frac{1}{2}$ bushels to the acre.

MARSHALL'S LAWN GRASS SEEDS

MARSHALL'S "SPECIAL" LAWN GRASS MIXTURE

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture includes highest grade cleaned seeds of Crested Dogtail, Creeping Bent, Rhode Island Bent, and other fine Grasses with White Clover.

Price: Lb. 40c., 5 lbs. \$1.75, bus., (20 lbs.) \$6.50, 25 lbs. \$8.00, 100 lbs. \$30.00.

MARSHALL'S "CENTRAL PARK" LAWN GRASS

Marshall's Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeding for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

One quart will sow 15x20 feet (300 square feet); one peck, 50x50 feet (2500 square feet); one bushel, 100x100 feet (10,000 square feet); four bushels one acre.

Price: Pt. 15c., qt. 25c., 4 qts. 75c., pk. \$1.25, bu. (20 lbs.) \$4.50.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: qt. 30c., 4 qts. \$1.00, pk. (5 lbs.) \$1.60, bu. (20 lbs.) \$6.00.

SPECIAL LAWN GRASS MIXTURE FOR SEA-SIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: qt. 30c., pk. \$1.50, bu. (20 lbs.) \$5.00.

MARSHALL'S LAWN RESTORING GRASS SEED

A mixture of grasses suited to take firm hold and grow quickly on hard, worn out, or burned spots. The best time to resow them is very early in Spring, but seed may also be sown from September to October.

Price: Qt. 25c., pk. \$1.25, bu. (20 lbs.) \$5.00.

MARSHALL'S TERRACE MIXTURE LAWN GRASS

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Qt. 30c., pk. \$1.75, bu. (20 lbs.) \$6.00.

MARSHALL'S SPECIAL MIXTURE

For Tennis Courts, Croquet grounds, Bowling Greens, etc.

A mixture of grasses that will form a good turf adapted for outdoor games, containing fine-leaved, deep rooting grasses that spread and maintain a tough evergreen sward and improve by stamping. The seed should be sown thickly to obtain quick results.

Price: Qt. 30c., 4 qts. \$1.00, pk. \$1.75, bu. (20 lbs.) \$6.00.

PERMANENT GRASS MIXTURES FOR GOLF LINKS

MARSHALL'S FAIR GREEN MIXTURE

This is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair-Green use. They are all of dwarf spreading growth, forming a close velvety surface which improves from year to year if given proper care.

Price: Bu. (20 lbs.) \$4.00.

MARSHALL'S PUTTING-GREEN MIXTURE

The hardest and finest low growing Grasses are contained in this Mixture. It produces a beautiful and lasting green turf calculated to withstand hard wear and tear.

Price: Pk. \$2.00, bu. (20 lbs.) \$7.00.

GRASSES FOR PERMANENT HAY CROPS AND PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 5 pounds of Mixed Clover Seed per acre.

GENERAL LIST OF Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND
POUND RATE TO ANY POST OFFICE IN THE UNITED STATES.

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture:

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter, and thrive in the garden during the warm months.

SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivalled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

MARSHALL'S SPENCER TYPE SWEET PEAS

The Spencer types of Sweet Peas are a great improvement over the Large Flowering varieties. For cutting and exhibition purposes they are indispensable. The following varieties are a selection of the many kinds of this class best adapted for general use.

No. 11 Planet Jr. Double Wheel Hoe, Cultivator, Plow and Rake.

Price, with attachments as in cut, \$11.00.

No. 12 Double Wheel Hoe, Price \$8.75

This is identical with No. 11 Wheel Hoe, except that it has one pair plows, one pair hoes, two pair cultivator teeth and a pair of leaf filters only.

No. 66 Planet Jr. Slide Hoe, Price, \$3.50

It straddles rows and works closely both sides of the rows at once, or, by changing the hoes, will work between rows. The slides lift up the tops of onions and other plants and work beneath without bruising the plants. Particularly useful in late cultivation and harvesting.

No. 16 Planet Jr. Single Wheel Hoe.

Price, with attachments shown in cut, \$7.25

No. 17 Single Wheel Hoe, Price, \$6.25

The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

No. 18 Single Wheel Hoe, Price, \$4.50

Has one pair of 6-inch hoes only—the tools that are most constantly useful. Other tools can be added as needed.

No. 39 Planet Jr. Single Wheel Hoe, Cultivator and Plow.

A useful gardener's tool, with two hoes, one large plow, one pair of three-prong cultivator teeth, and leaf lifter. Price complete, \$7.00.

Fire-Fly Garden Plow

Price, \$2.75.

This tool will enable a busy man to do nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

Planet Jr. Spot and Drill Marker

Very useful for marking out the rows when transplanting all kind of plants to ensure the same distance apart between the plants and rows.

One Row Spot Marker for attaching to any Wheel Hoes. Price, \$3.00.

Two Row Spot and Drill Marker. Price, \$5.50.

PLANET JR. TOOLS—Continued

No. 25 Combined Hill and Drill Seeder and Double Wheel Hoe

As a seeder it will sow in drills any thickness or drop in hills 4, 6, 8, 12 or 24 inches apart. It is thoroughly substantial and is accurate in planting all kinds of garden seeds in either hills or drills.

As a wheel hoe it is practically the same as the admirable Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow. Price, complete, \$16.00.

No. 4 Planet Jr. Combined Hill and Drill Seeder Wheel Hoe, Cultivator and Plow

Price, complete.....\$13.25
No. 4, as a Seeder only..... 10.75

Does the work of almost all garden tools combined. It sows accurately all garden seeds in drills or in hills 4, 6, 8, 12 or 24 inches apart, cultivates, furrows and plows.

No. 19 Farmer's Single Wheel Hoe, Cultivator and Plow

A cheap and efficient garden tool, consisting of one plow, one 10-in. sweep, one 5-in. sweep, one 2-in. cultivator, and one 4-in. cultivator. Price, complete, \$4.25.

No. 31 Planet Jr. Combined Seeder and Wheel Hoe

It combines a thoroughly reliable Seeder that will sow all garden seeds from the smallest up to peas and beans, with a first-class light running Wheel Hoe. A very practical tool for all gardeners.

No. 31 Complete Seeder and Wheel Hoe....\$8.50
No. 32 As a Seeder only..... 6.00

No. 33 As a Wheel only.....\$3.75.

No. 104 Horse Hoe & Cultivator

COLDWELL'S DEMOUNTABLE HORSE LAWN MOWER

The Demountable Cutter Unit Horse Mower is constructed upon an entirely new principle and is a wide departure from anything of the kind ever made. The cutter section, which is the vital part of a lawn mower, is made into a unit and is independent and removable from the main frame of the mower. This unit consists of a simple frame containing the revolving cutter, the bottom or stationary knife and parts necessary for adjusting the same to each other. It is attached to the main frame of the mower by four locking screws and can be attached or removed in less than a minute.

This unit, being the cutter section of the mower, is the only part necessary to send in to the factory for sharpening or adjusting.

TOWNSEND'S LAWN MOWERS

THE "TOWNSEND" HORSE LAWN MOWER

The most perfectly constructed Horse Lawn Mower on the market. Triple rolls with triple pawls in each roll. Unlike other mowers the motion of the blades is maintained even when turning sharp corners. The height of cut and motion of knives is under perfect control of the driver from his seat, and the large rolls (15 inches in diameter) insure great power and ease of movement.

THE "CLIPPER" MOWER

The cut shows a perspective view of the "Clipper" Mower. In the first place you will observe the cutter bar is directly in front of the wheels. The wheels travel over ground where the grass is cut, never rolling down the standing grass with the wheels, as other Lawn Mowers do. The small gauge wheels at the side are to gauge the height you wish to cut the grass.

COLDWELL'S COMBINATION ROLLER AND MOTOR LAWN MOWER

This machine is designed for use on small estates, tennis grounds, etc. It cuts a swath 40 inches wide, is equipped with a 2-horse power motor, capable of propelling the mower through almost any height of lawn grass and up grades as steep as 25%. It is also equipped with Coldwell's patented demountable cutting unit. This device is an extra cutter composed of the knives and parts to carry them, which can be removed from the machine in a few moments and replaced by the other unit. It is also equipped with a new patented device for raising the knives when crossing gravel walks, roads, etc., thus protecting them from injury. Clutches are provided to throw the traction rollers, as well as the revolving cutters in or out of gear.

Price, including Extra Cutter Unit, Style F., \$475.00.

F. O. B. Factory.

THE COLDWELL MOTOR LAWN MOWER

Weight, 2000 pounds. Equipped with 2-cylinder, 4-cycle, latest improved automobile motor. Consumes three-fourths of a gallon of gasoline per hour; cuts 40-inch swath. Guaranteed to negotiate 25 per cent. grades. Cutting part can be lifted from the ground by means of a single lever.

Style D., \$1300.00. Net F. O. B. Factory, Newburgh, N. Y.

"UTICA" LAWN TRIMMER

Cuts every blade of grass left by a lawn mower close to fences, trees, flower beds, etc. Knives keen edged with a 5-inch cut. Can be used with one hand and does better work in one third the time it would take with shears or grass hooks.

Price, \$3.50.

HORSE BOOTS

Made of heavy leather, preventing injury to the sward by the horse's feet.

Price: Set of four, Medium Size, \$10.00; Large, \$11.00.

Prices of all Lawn Mowers are subject to change without notice, owing to advance in prices of raw material.

"THE APOLLO" LAWN SWEEPER

The Apollo
Lawn Sweeper

The machine consists of a revolving brush which throws the sweepings forward in the large grass box, which, when full, is dumped by merely pulling a cord. It removes all cut grass, leaves, twigs and by setting it low it is excellent for taking out crab grass.

Price, 24 in. \$14.00; 28 in. \$15.00.

Special Golf Green Sweeper, 28 in. \$18.00.

PENNSYLVANIA ROTARY LAWN CLEANER

A revolving fan with metal teeth creates an air current which carries in to the canvas baskets all leaves, dead grass, stone, etc., that the rake encounters. It straightens up crab grass and other running weeds so that they may be cut by lawn mower. It combines strength and durability with light construction. 24 inches wide. \$17.00. 36 inches wide, \$25.00.

Pennsylvania Lawn Cleaner

WATER BALLAST ROLLER FOR LAWNS

With a Water Ballast Roller, one can secure any weight desired, by simply removing a cap and filling with as much water or sand as may be required.

The plug in the drum is coated with a non-rusting compound, so the plug is easily removed with the wrench that is furnished with all rollers. When filled with sand they weigh 50 per cent. more than with water.

The "WB" type is fitted with a steel scraper, which is adjustable and can also be used to hold the handle in place when not in use.

COMPRESSED AIR SPRAYERS

1—Straight nozzle.
2—Universal nozzle detached. 3—shows universal nozzle as attached to holder for safe keeping when not in use.

To use the universal nozzle it is substituted for the straight nozzle No. 1 on the end of the tube.

These Patent Sprayers are universally conceded to be the best ever made. They give a continuous spray, reduce the liquid to a fine mist-like vapor and throw it with great force, so that it is driven into the smallest cracks and crevices. By means of the universal nozzle the spray can be thrown on the under side of the leaves of plants and shrubs, and other difficult places inaccessible with the ordinary sprayers.

PORTABLE REFUSE BURNER

A portable steel furnace for the rapid and convenient destruction of all leaves, refuse and waste matter. In reality a two-wheeled hand cart (for which purpose it can also be used), made of strong steel angle iron and heavy steel netting, which is fire-proof and guaranteed not to burn out. Is fitted with broad-tired wheels, which enables it to be pulled along with the cleaning up squad on lawns or soft ground without injury. A strong steel pan is fitted under the axle, which catches all the fire and ashes as they fall through the bottom. This pan can be easily emptied as needed.

Against the cost of hauling the leaves and rubbish to a convenient spot for burning, the leaf burner will pay for itself twice over in one season.

- No. 1 Capacity 1 cubic yard.....\$32.50

PORTABLE WOOD HURDLES

They are suitable for enclosing and dividing lots or plots to suit any requirements on a gentleman's country seat, or for farmers' use in general. They measure 8 ft. 3 in. in length.

With 4 bars, suitable for horses and cows, per 100, \$105.00.

With 5 bars, suitable for sheep, per 100, \$120.00.

4-bar Hurdle Gate, 10 ft. long, each \$3.50.

5-bar Hurdle Gate, 10 ft. long, each \$4.00.

PERFECTION TOMATO SUPPORT

This is the most practical support on the market. It is made of wood and will not burn the vines in hot weather, or cut them off when swayed by the wind.

The height is 36 in. and the width 16 in. It can be unfolded after use without damage and stored away for the following season. Each 30c., doz. \$2.50.

WIRE TOMATO SUPPORT

Made with heavy wire, three legs and forming two rings. Each 20c., doz. \$2.00.

HOE-RAKE ATTACHMENT

This attachment can be fastened to any size Steel Rake and used as hoe on the back of the rake. When raking drives or walks often weeds are found, and by simply turning the rake over the Hoe Attachment can be used to great advantage in destroying them. Each 25c.

THE BALL PLANT PROTECTOR

This is a muslin-covered Plant Protector designed to meet the requirements of a rough-and-ready protector of great durability, for all kinds of plants (not seeds) after setting them outside.

These protectors have strong wooden frames, covered with good muslin, of such a shape so as you can nest them one inside the other, like clay flower pots.

They have projections below the bottom which serve as anchors when pressed into the soil, thus preventing a strong wind from blowing them over. No. 1 size, 9 inches diameter, 12 inches high. Doz. \$2.50.

HARDWOOD BEAN POLES

Made from hard wood, 8 feet long, pointed to drive in the ground; 1½ inches square and tapering to 1 inch at the top. Each 20c., doz. \$2.00.

STICKY TREE CORD

Trees banded with Sticky Tree Cord are not unsightly. It is far the easiest, most effective and most economical method. No injury is sustained by the tree because little material comes out of the cord, and it is non-poisonous. Rough barked trees such as Poplar, Gum, etc., should have a channel 2 inches wide cut into the bark to give a fairly smooth surface for the cord. No caterpillar, slug, worm or other insect can cross it nor go underneath it if properly applied. It is easy to remove in the Fall, leaving very little trace. Per tube containing about 30 feet of cord, 25c.

THE "VELVETLAWN" SEEDER

An excellent New Machine for Seeding Old or New Lawns

Puts Seeds in old sod or new ground securely. Covers and rolls same.

Will sow, cover and roll seed to any desired depth in a strip 16 in. wide, as fast as a man can walk. Cutting action of the discs relieves old sod of root-bound condition. The discs cultivate the grass roots. Each disc automatically conforms to inequalities in the soil.

The operator can drill any amount of seed desired.

The "Velvet Lawn" Grass Seeder puts the seed in the ground, not on top. Birds, wind and rain will have no ill effect when

the seed is drilled into the soil.

THE STANDARD INOCULATION FARMOGERM

High-Bred Nitrogen-Gathering Bacteria
for Clovers, Alfalfa, Beans, and Other Legumes

To insure a stand, enrich your soil, increase the yield, always treat your Clovers, Alfalfa, Peas, Beans, Vetch, Soja Beans, Cow Peas, Field Peas, Sweet Peas and all Legumes.

Inoculation of Legume Seeds with FARMOGERM

Is a simple process; no fuss, no bother. Just moisten the seed with Farmogerm, pure cultures, allow them to dry, and plant. Seeds for 20 acres can be treated in a few minutes and the results will surprise you. In order to obtain the maximum yield legume (or pod bearing) crops, seeds must be supplied with nitrogen-gathering bacteria. Farmogerm supplies these bacteria, guaranteed alive and efficient, and shipped in a form to be conveniently applied to the seeds. Their use will increase the yield of the crop and make it richer in protein or feeding value. Your stock will relish Farmogerm Legume Fodder.

Cost of FARMOGERM	Farm Size, 50 acres.....	\$50.00
	Small Farm Size, 5 acres.....	5.00
	Trial Farm Size, 1 acre.....	1.50
	Garden Size, $\frac{1}{4}$ acre.....	.50
	Half Garden Size, $\frac{1}{8}$ acre.....	.25

In ordering, state what legume you wish to plant.

It is impossible to explain this subject fully. Write for special circular.

Inoculate Your Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches and all other legume crops with

Mulford Cultures

FOR LEGUMES

Uninoculated ALFALFA Inoculated
Photographed on same scale. Plant on left not inoculated—Plant on right inoculated with Mulford Culture for Alfalfa. All other conditions identical.

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

Mulford Cultures are "different," and should not be confused with other brands.

Legumes offer the best known means of maintaining soil fertility and rejuvenating over-cropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Dept. of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are prepared for:

Alfalfa	Alsike Clover	Vetch	Lima Beans
(Lucerne)	Burr Clover	Velvet Beans	Lespedeza
Crimson Clover	Cow Peas	Sweet Peas	Beggar Weed
Sweet Clover	Soy Beans	Garden Peas	and others
Red Clover	Peanuts	Garden Beans	

Be sure to specify the particular legume on which you desire to use the Mulford Cultures, otherwise we will not know how to fill your order.

STERLINGWORTH WEED KILLER

For killing weeds in walks, drives and tennis courts where no vegetation is wanted. In powder form, to be dissolved in water. One lb. makes 15 gals., sufficient for 50 sq. yds. Lb. 50c., 5 lbs. \$2.00.

HERBICIDE WEED KILLER. A liquid preparation for the killing of weeds of every kind on roadways, paths, gutters, tennis courts. One-half gal. makes 10 gals. liquid, $\frac{1}{2}$ gal. 80c., 1 gal. \$1.50, 5 gals. \$5.50, 10 gals. \$10.00, 25 gals. \$22.50.

KEY BRAND WEED KILLER. Destroys weeds in paths, roads and gutters. Dilute one part Weed Killer to 40 parts water. Qt. 50c., gal. \$1.25, 5 gals. \$4.75, 10 gals. \$9.00.

STERLINGWORTH LAWN COMPOUND

Kills weeds in lawns without killing the grass, and makes the lawn green and velvety.

It is a non-poisonous, dry powder which adheres to the broad, flat leaves of weeds and does not stick to the grass because of its upright growth and smooth surface. The ingredients in combination with the sun's rays burn out the weeds. It is easily applied by sprinkling over the weedy lawn. One pound will dress 100 to 200 sq. ft., depending upon the lawn's condition. 5-lb. cans 60c., 50-lb. kegs \$4.00, 100-lb. kegs \$7.50.

Prices of Insecticides are subject to market changes.
